

What is Marine Personnel Crewing System (MPCS)?

Marine Personnel Crewing System was built up as a complete suite of applications covering all aspect of modern day Marine Crew Management. The MPCS was developed to facilitate easy information management and document archiving, provided by top of the line technology from Microsoft(R).

Marine Portal - Crew Management

In response to expensive Marine Crewing Software, AppCase has developed a Crew Management System with attached Payroll System. Target consumers are Small to Medium and Large crewing agency in Asia and Europe. Currently being use by several crewing agency in Manila providing Crew Management service to International Shipping and Offshore industry with clients in Hong Kong, India, Japan, Singapore, Cyprus, Dubai and Greece.

Types of User

Regular User

This type of user is allowed to navigate Seafarers Modules and/ or Accounting Modules. The user can use either one of this modules or both modules.

Client User

This type of user is only allowed to view and print Vessel crew list and Vessel Crew Rotation.

Administrator User

This user delegates the task of managing user's role while withholding assign roles. The administrator may select roles available for assignment.

System Features

 It has a built-in payroll module allowing a seamless data exchange simplifying Crew Management agency operations.
